

MANAL ANWER

Artificial Intelligence Engineer | ML & Generative AI

manal.anwer.elsaied@gmail.com | +20 1275457696 | Egypt | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

AI undergraduate at Tanta University (GPA 3.613/4.0) with hands-on experience in machine learning, deep learning, NLP, and generative AI systems. Proven record of building and deploying end-to-end ML pipelines, recommendation systems, and agentic AI applications through competitive internships and academic projects. Selected among 5,000 participants in Google Cloud's Build with AI program.

EDUCATION

B.Sc. in Artificial Intelligence | Tanta University

Aug 2022 – Jun 2027 (Expected)

GPA: 3.613 / 4.0 (Very Good) — Faculty of Engineering

TECHNICAL SKILLS

Languages

Python, SQL, C++, Go

ML / AI

Machine Learning, Deep Learning, NLP, Generative AI, Agentic AI, Recommendation Systems

Frameworks

TensorFlow, Scikit-learn, FastAPI, Streamlit, Next.js, Docker

Cloud & Platforms

Google Cloud, AWS, Hugging Face Spaces, n8n, GitHub

Workflow Tools

JIRA, Agile / Scrum, Git

WORK EXPERIENCE

Agentic AI and Generative AI System Developer | DEPI

Jul 2026 – Jan 2027

- Learning and applying Large Language Models (LLMs), prompt engineering, API integration, and open-source AI technologies.
- Building AI applications using Retrieval-Augmented Generation (RAG), memory systems, agentic AI, and multi-agent systems.
- Developing, deploying, and monitoring end-to-end AI solutions while exploring ethical AI practices and modern AI development workflows.

AI & Machine Learning Trainee | ROUTE

Jul 2025 – Dec 2025

- Completed an intensive 6-month AI & ML diploma focused on supervised/unsupervised learning, model evaluation, and end-to-end ML workflows on real-world datasets.
- Built and tuned predictive models covering regression, classification, clustering, and neural networks.

Machine Learning Intern | National Telecommunication Institute (NTI)

Jul 2025 – Aug 2025

- Completed a 120-hour internship implementing supervised and unsupervised ML models on structured datasets, covering data preprocessing, feature engineering, and model evaluation.
- Gained hands-on experience with Scikit-learn pipelines and performance benchmarking techniques.

Software Engineering Intern | DreamSoft

Aug 2024 – Sep 2024

- Contributed to a gym management system by designing normalized SQL schemas, building RESTful API endpoints with FastAPI, and coordinating sprint tasks using JIRA in an Agile workflow.

PROJECTS

MedSeek Infant Health Assistant – Multimodal Hybrid RAG for Pediatric Care (Hackathon Project) — [GitHub →](#)

- Built an evidence-based multimodal RAG assistant for pediatric care with hybrid dense/sparse retrieval, dual-persona clinical safety architecture, GPT-4o-mini vision, bilingual voice ingestion, and zero-hallucination guardrails via a production Telegram bot.

ReadNext – AI Book Recommendation System — [GitHub →](#)

- Built an AI-powered recommendation engine using content-based filtering and semantic book search; designed to surface personalized reading suggestions from a large book corpus.

New York City Airbnb Open Data – EDA & Preprocessing — [GitHub →](#)

- Performed exploratory data analysis and end-to-end preprocessing on the NYC Airbnb Open Dataset, handling missing values and outliers, engineering features, and visualizing pricing and availability trends across neighborhoods to prepare the data for downstream predictive modeling.

Music Popularity Prediction & Audio Pattern Discovery — [GitHub →](#)

- Developed ML and deep learning models to predict Spotify track popularity and analyze audio features; applied feature extraction and clustering to surface audio pattern insights.

Medical Cost & Risk Predictor – ML Model Deployment on AWS — [GitHub →](#)

- Built and deployed a machine learning model to predict medical cost and risk from patient data, covering data preprocessing, model training/evaluation, and cloud deployment on AWS for real-time inference.

Legal Document Intelligence System — [GitHub →](#)

- A Retrieval-Augmented Generation (RAG) application for analyzing large legal documents.

Email Spam & Phishing Detection System — [GitHub →](#)

- Built an AI email analyzer combining NLP-based text classification and email authentication checks (SPF/DKIM) to detect spam and phishing with high accuracy.

Viral Reel Machine — [GitHub →](#)

- An AI-powered content repurposing tool that automatically transforms long-form videos into viral-ready short-form reels.

CERTIFICATIONS & PROGRAMS

Build with AI: Masr Edition — Google Cloud | 2026

Competitively selected among 5,000 applicants to develop AI solutions using Google Cloud infrastructure and Vertex AI tooling.

Machine Learning Specialization — Coursera & Andrew Ng

Covered supervised learning, unsupervised learning, model evaluation, regularization, and practical ML system design.

Deep Learning Institute – Machine Learning — NVIDIA DLI

Hands-on training in ML and AI development using NVIDIA GPU-accelerated frameworks and industry workflows.

LEADERSHIP & VOLUNTEERING

Head of Arts Committee | Tanta Engineering Students' Union

2025 – 2026

- Led a committee within the student union board, planning and executing large-scale student events and cultural initiatives.
- Coordinated cross-committee collaboration and managed logistics for artistic and community-building programs.
